## CEG Gas and Sewer Line Clearance

Good afternoon, Paul,

Per our conversation, I have provided a description on the clearances of gas and sewer lines.

For gas service and distribution lines, we specify a clearance of 3 ft. between the pipe and any foreign structure. I'm currently confirming clearance on sewer lines, but I will update you if I hear anything differently than the 15 ft. from your first conversation.

If you have any other questions, feel free to reach out.

Thanks,

**Kyle Rodebeck**
